A Message From

MARÇOS MULLER HÂBÎG

A Very Warm Welcome
to our New Pisciners!

We are incredibly proud to welcome our second batch of Pisciners in 2024 and guide them on their journey towards becoming Abu Dhabi's next generation of digital leaders.

Hosting our second Piscine this year is a significant milestone in our array of achievements, serving as a testament to our growth and underscoring the growing demand for coding skills in the region. It also reflects our commitment to meeting the needs of the rapidly evolving digital landscape and empowering individuals with the tools and knowledge they need to thrive in the tech industry.

While the Piscine journey may present challenges, I have full confidence in the capabilities and potential of our Pisciners. Each of them brings a unique set of skills, experiences, and perspectives to the table, contributing to a diverse and dynamic learning environment. Together, we're committed to empowering them to unleash their full potential and become part of our vibrant coding community at 42 Abu Dhabi.

Did you know?

Amazon expands enterprise AI play with wider availability of its Q chatbot

Amazon is doubling down on enterprise AI with the release of its AI chatbot Q, even as its competitors angle to offer more consumer-facing products.

Amazon says it also added new capabilities to Q ahead of general availability. Amazon Q Developer provides coding assistance, app testing, security scanning, and troubleshooting. Developers can ask Q to list their AWS resources to see how much computing power they have or call up AI agents that autonomously perform tasks like software updates or documenting code.

Amazon Q Apps, another new feature, aims to make building generative AI-based apps easier, even for employees without coding experience. Amazon says users just have to describe the type of app they want in a prompt, and Q will generate the app they're looking for.

What's Up at 42 Abu Dhabi?

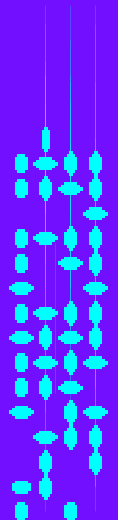

Kicking off the **May Piscine** with the Spring Festival

We recently hosted the Spring Festival as a special welcoming event for our second batch of Pisciners. This event served as the perfect introduction for newcomers to our campus, coding community, and fellow coding superstars.

Lights, Camera, **Action!**

We organized a Movie Night for all our students as an opportunity for them to relax, unwind, and bond with their peers outside of their learning environment. It was also a fantastic way to recharge and foster a sense of community among our coders.

Unleashing our Students' Inner Artists with a Calligraphy Workshop

In April, we organized a Calligraphy Workshop for our students to unlock their inner artists and unleash their creativity. Led by a talented calligraphy artist, the workshop provided a refreshing break from coding screens and offered a chance to explore creativity through a different lens.

Capture the flag competition

A big shoutout to everyone who participated in the Capture the Flag hackathon organized by beacon Red! Your enthusiasm and teamwork made the event a huge success.

We would also like to congratulate the winning teams below for their extraordinary efforts:

2nd place AA FALCON TEAM

Ahmad Kanbari

Abdullah Ali

1st place ALSOGOOR TEAM

Ahmed Salem

Abdalrahman Tukka

Ahmed Nadir Alfahal

3rd place JESTERS TEAM

Emad Aldeen Hammoude

Pierce Polintan

Taha Helmy

Abu Dhabi Autonomous Racing League

During our participation in the Abu Dhabi Autonomous Racing League, our team tackled a complex coding challenge. This encompassed comprehending grip dynamics, regulating tire temperatures, forecasting opponent maneuvers, executing effective overtakes, and pushing the SF23 to its grip threshold—mirroring the instincts of human drivers. Despite the challenges, our team secured 5th place, a testament to their dedication and skill, of which we are immensely proud.

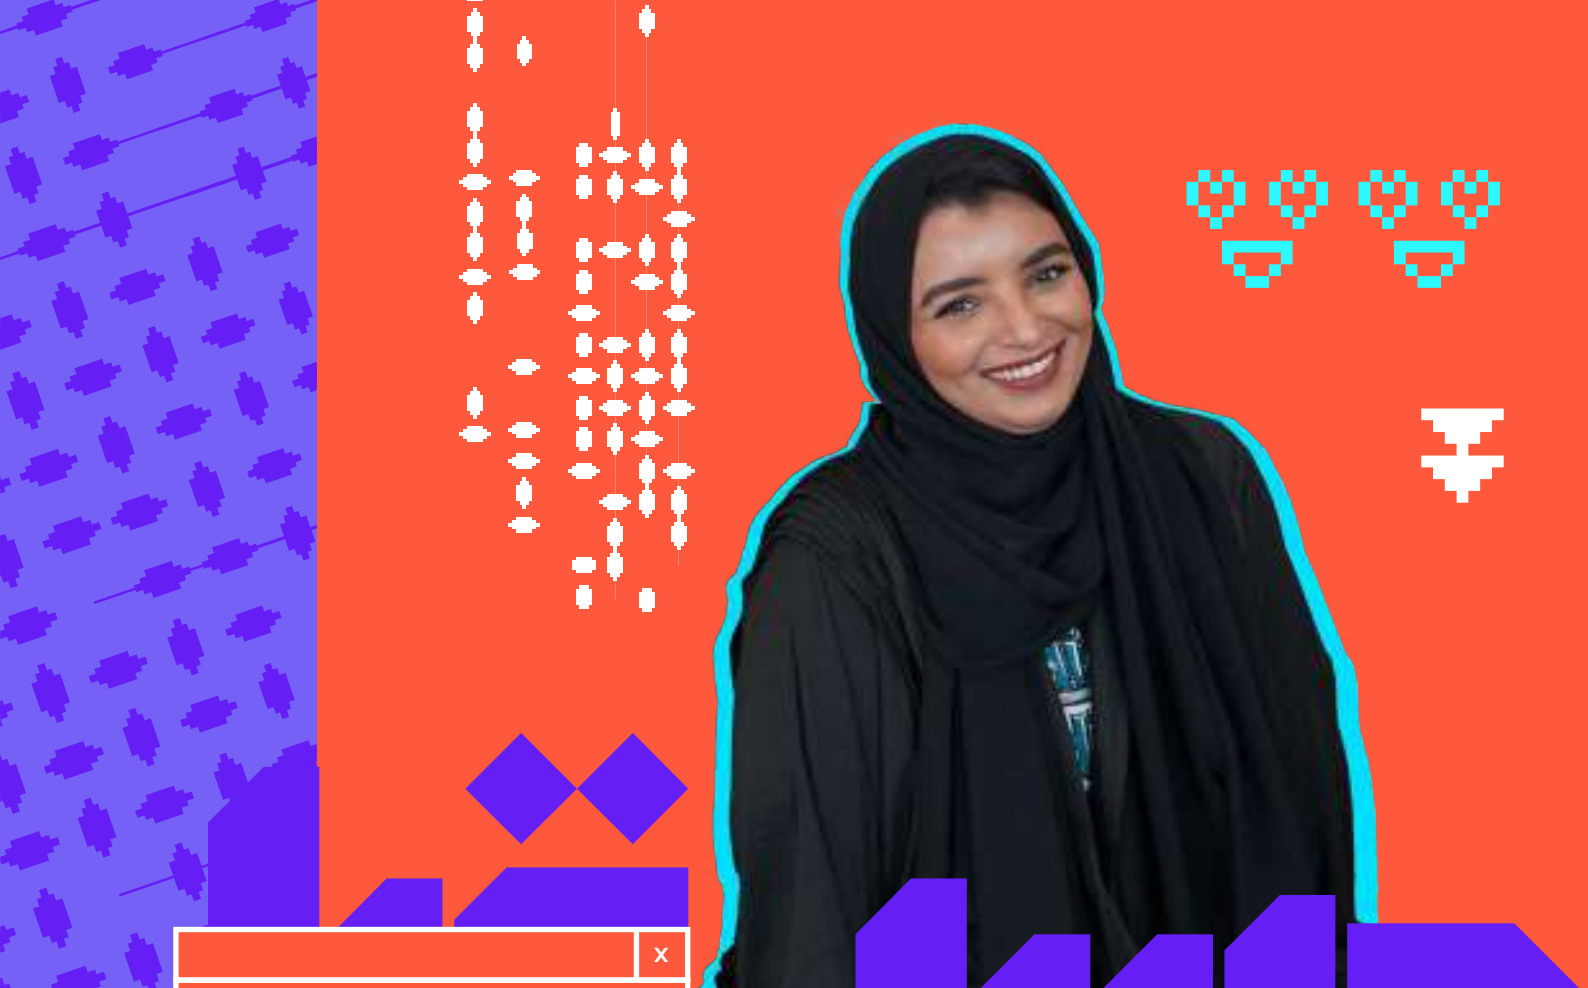

CODERS' SPOTLIGHT

42 Abu Dhabi has played a pivotal role in shaping both my coding journey and career aspirations. My manager, coworkers, friends, and family have been integral sources of support and encouragement throughout my coding journey. Their unwavering belief in my abilities has been instrumental in my decision to pursue coding and enroll at 42 Abu Dhabi. I've not only gained an array of technical skills but also developed trust and confidence in my professional abilities. The program has unlocked numerous opportunities to me, and I proudly share my experience at 42 Abu Dhabi wherever I go.

Nouf Al Shibly

Marwa Alamri

Joining 42 Abu Dhabi significantly broadened my perspective on the possibilities within the field of technology. The program not only introduced me to new areas of programming but also ignited my passion for mastering this discipline. It played a crucial role in helping me set clear career goals aimed at leveraging the latest advancements in technology and contributing to the era of rapid and sustainable development. My family, especially my mother, played a significant role in encouraging me to pursue coding. Their support was instrumental in my decision to enroll at 42 Abu Dhabi, knowing they believed in my potential and aspirations.
